EAN **3831166000293**	

Port - a series of built-in waterproof lamps made of polymer for a replaceable lamp. The design of the fixtures is as neutral and versatile as possible. Models are equipped with a large-diameter matte diffuser that perfectly scatters light in the space of the room. The series is ideal for wet areas. The lamp is not included. For this series, we recommend ultra-thin SLIM LED modules as a light source, the installation depth is only 35 mm.
