The ideal light source for recessed luminaires. Only 2 cm high - SLIM LED modules are indispensable for any type of false ceiling. They allow you to maximize the height of the room, as they require a minimum ceiling space. DENKIRS SLIM LED modules replace any standard (halogen, fluorescent, LED) lamps of standard size MR16 with a diameter of 50 mm. Most often, these are LED lamps with a GU10 or GU5.3 base.
