Date	|		

Dear Kaushik Chatterjee,

Thank you for reaching out to HCG- Healthcare Global Enterprises Ltd. HCG is pleased to offer this online expert consultation service for assessing your treatment options.

We asked the following question(s) to our oncologists on your behalf:

test

HCG is pleased to provide additional information on Investigations suggested.

test

We hope that the expert opinion is helpful in determining the course of your treatment. Please discuss this opinion with your treating oncologist(s).

Case Summary

Diagnosis

Diagnosis	Digestive organs, NOS (C26.9), Dermatofibrosarcoma protuberans, NOS (8832/3)		
System	Gastro Intestinal	**Topography**	Other and ill-defined digestive organs
Laterality	Bilateral involvement, Lateral origin Unknown	**HP Grading**	Grade II : Mod Diff, mod well diff, intermediate diff

Histopathology Findings

test

PET-CT Findings

test

Other Findings

test

Evaluation of shared reports

1) **Investigation Done** 5357
   Investigation Date 05 Dec 2023
   Clinically Relevant Finding
   test

Lifestyle Risk Assessment

1) **Name** Tobacco chewing
   Status Y

HCG Brief Profile

HCG- Healthcare Global Enterprises Ltd., is a healthcare organization headquartered in Bangalore with a combined pool of 500 specialists across various domains. The specialization and focus are mainly on Infertility, Tertiary Care, Cancer Care and Advance Diagnosis. HCG, the specialist in cancer care is India's largest cancer care provider with a group of 275 oncologists across 21 cancer centres, having to its credit many accomplishments from being an oncology leader of the year to Asia's most sought-after healthcare brand and the best place to work in healthcare in India. HCG has been at the forefront in fighting cancer through its Medical, Radiation and Surgical Oncology department.

Medical Oncology, specialty team works towards preventing, diagnosing, and treating cancer by offering the highest levels of treatment protocols and customised multi-modality therapies. In addition to chemotherapy, the department also runs protocols and specialises in outpatient and ambulatory chemotherapy.

Radiation Oncology offers a wide range of internal and external radiation therapy options that include 3d-CRT, IMRT, IGRT, Stereotactic Radiosurgery and Brachytherapy to name a few. We are on continuous pursuit to add new and more advanced radiation technologies in our arsenal. In last few years, we have become one of the few cancer centres in India to offer the following therapies:

Cyberknife: A non-invasive alternative to surgery for the treatment of tumours anywhere in the body, including the prostrate, lung, brain, spine, liver, pancreas, and kidney.

TomotherapyTM H: A state of the art image guided, and intensity modulated radiotherapy technique that combines the benefits of CT scan and high energy radiotherapy machine.

TrueBeamTM: Designed from the ground up to treat moving targets with advanced speed and accuracy, the TrueBeam platform is fully integrated system for image guided radiotherapy and radiosurgery.

AgilityTM with SynergyTM: Enables extremely accurate, image guided adaptive radiotherapy to be delivered safely and in a short period of time. This makes it possible to irradiate any site in the body with great precision, so much so that even non-cancerous conditions like meningioma, trigeminal neuralgia and acoustic neuroma can be treated effectively.

ARTISTETM: Linear accelerator can be used for different treatment approaches, including 3D conformal radiation therapy, IMRT,

IGRT, SRS and SBRT.

Brachytherapy: Radiation source is placed inside or next to the area requiring treatment. Commonly used as an effective treatment for cervical, prostrate, breast and skin cancer. It can be used alone or in combination with other therapies such as surgery, EBRT and chemotherapy.

Hyperthermia: a type of medical treatment in which body tissue is exposed to slightly higher temperatures to damage and kill cancer cells. When combined with radiation therapy it's called thermoradiotherapy. Whole-body hyperthermia has also been found to be helpful for depression.

Surgical Oncology: The team has been moving towards a more radical approach towards organ preservation, shorter hospital stay, less post-operative morbidity and minimal invasive surgeries and robotic surgeries. Intent to cure, manage or down stage cancer or symptom control. Primary treatment of choice in many early-stage solid malignancies such as Gynae Onco, Breast Onco, Uro Onco, Ortho Onco, Head and Neck and Oral Onco, Hepatopancreatobillar and Liver Transplantation.

HCG provides Holistic care for Bone Marrow Transplant (Autologous, Allogenic and Halogenic), Prostrate Cancer, Breast Cancer, Lymphoma & Leukaemia, Cervical Cancer, Brain Tumours, Bone Cancers, Thyroid Cancers, Lung Cancer, and Liver Tumours including Liver Transplantation to name few.
