EXPERIENCE

INFOSYS

SENIOR ASSOCIATE CONSULTANT | From 2021 to present

Project 1

Name: IoT Smart Spaces - Command Center

Details: This product allowed property owners and tenants to draw meaningful insights about the property, by helping them visualize data aggregated from various IoT sensors.
As a UI developer, I helped building the user interface for the command center. I managed fellow UI developers, reviewed their code, gathered requirements and wrote scalable code for this project.

Project 2

Name: Client Engineering - Digital Transformation

Details: I helped one of the biggest clients of Infosys, who also happens to be the largest consumer electronics company in the world, in their digital transformation.
I lead several UI projects for this client including converting a simple static web app into a fully responsive, highly accessible and scalable ReactJS application.

TEAMLEASE SERVICES

ASSOCIATE DEVOPS ENGINEER | From Jul 2019 to Jun 2021

Project 1

Name: Employee on-boarding system - IConnect

Details: This product allowed business owners to on-board their employees with ease. As a contributor I worked on requirements gathering, data archival to AWS Glacier, application testing and support.
