

Elevating Textile Operations

GRUNDFOS 

Possibility in every drop

The textile industry is transforming rapidly

Rapid innovation, fast turnover, and low prices are the new market drivers

The focus on sustainable operations is becoming a critical business necessity

Manufacturers are adopting intelligent technology solutions at an unprecedented pace

This presents new challenges for your business

The increased pressure to maintain operational continuity

Constantly combating rising production costs

Reducing OPEX and resource consumption

Ensuring compliance with waste water regulations like Zero Liquid Discharge (ZLD)

Adopting technology solutions that deliver positive results

Achieving high ESG scores and sustainable goals

Grundfos delivers advanced and intelligent solutions with a wide range of pumps that enhance operational efficiency at every stage of production. From effluent treatment to water recycling and chemical dosing to finishing, our pumps help you reduce waste, optimize resource consumption, and ensure high precision.

We help you achieve your sustainable goals, demonstrate gains, and go to market faster with complete regulatory compliance. Our solutions help you transform into a market leader in sustainability, improving your position and profitability with cutting-edge technology.

Our services that deliver impact

Intelligent textile tech, tailored to your business

Energy-efficient pumps that reduce OPEX

40+ ZLD solutions that increase wastewater reuse

Energy audits to demonstrate impact

A global service network at the ready

Results that speak volumes

20%-60% Energy savings across textile applications

50% Reduced energy required for a boiler feed application

30% Energy reductions for textile manufacturer's ZLD treatment

30% Total OPEX savings for running an evaporator for 6th stage RO for ZLD treatment

Gain the Grundfos advantage

Our intelligent pump solutions deliver value across your value chain

Water management

Our pumps, mixers, flow makers, and diffusers are designed for efficient effluent treatment and water recycling.

Energy efficiency

Our pumps with features like Variable Frequency Drives (VFDs), smart digital dosing, and more ensure precision and enhanced resource management.

Process optimization

Our pumps are specifically designed to meet the large water demands during dyeing, dosing, and finishing through automation to reduce manual errors and improve efficiency.

Sustainability and compliance

Our intelligent pumping solutions are regulatory compliant and support sustainable practices, reducing environmental footprint and advancing sustainability goals.

About us

Every one of us is impacted by water's flow.

At Grundfos, we want to ensure it's accessible and reliable for all – to keep water flowing, while reducing the energy consumption that leads to increasing emissions. We're driven to take on the world's water and climate challenges, developing solutions together with our customers, partners and suppliers that touch millions and millions of people every day, without most even noticing it.

Discover more about our intelligent, energy-saving pump and water solutions for water utilities, industries and buildings, and the people behind them on our website.
