

# SHAKTI FOUNDATION

*an insight*

2022 / 2023

# Thematic Areas

---

Every year is special, and 2022 has been even more so. We have tried to capture some of the intervention areas that we have worked on in this brief update, and we hope it will give you a flavour of what we have been doing. It has been a year of learning, strengthening and, as always, joining hands with several friends such as yourself to move towards more effective ways of reaching as many people at the grass root level as possible.

## Livelihoods & Community Resource Centers

Through our programs like Gulmeher, we aim to train erstwhile waste-pickers in handicrafts and provide them with alternative livelihood development.

In 2023 the endeavor is for Gulmeher to become self-sustainable and replicate such community programs in multiple urban slums.

## Education/Sports/Digital Literacy

The education program provides educational support, besides exposure to extra-curricular activities and digital literacy to more than 300 enrolled children in urban slums.

In 2023, we propose to expose our children to computer coding, design, foreign languages & extra-curricular activities apart

## Waste Management

In 2023, we plan to foray into the field of plastic waste management, segregation and collection, partnering with waste-pickers, ensuring appropriate value sharing.

## Skilling

We plan to enhance our footprint in the space of skills-based training as well as entrepreneurship training for youth and women in urban areas

## Community Health Response (new area-TB)

Tuberculosis is a problem that requires a collaborative approach between Government and community based organizations. We propose to deepen this partnership, starting in Himachal Pradesh.

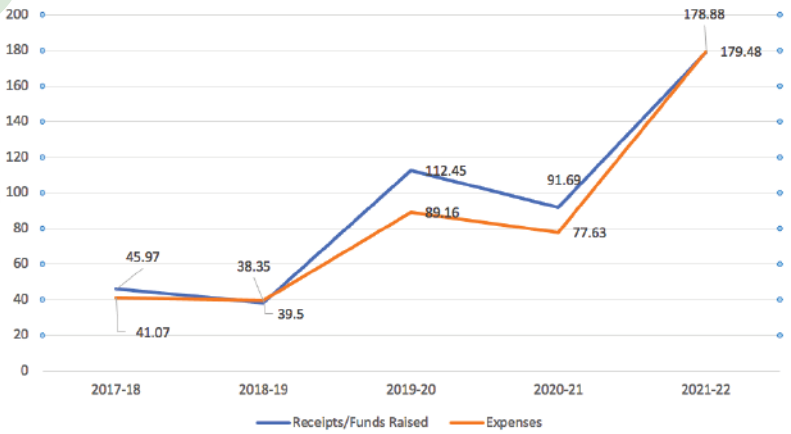

## Children with Special Needs

The Program is being run through our partner, **The Neuroaid & Research Foundation**

*“ We at SVP are proud to be associated with Shakti Foundation. It is really inspiring to work with Anurag and his dedicated team, and being part of their effort for transforming the lives of communities and making a real, visible impact on the ground in areas that require it the most”*

Adil Ahmad, Partner, SVP
