

## Sentiment towards AI

are comfortable with having AI in their day-to-day lives

believe the benefits of AI outweigh the potential negatives

## General concerns about AI

worry it will negatively impact vulnerable people, including kids and people with a disability

are concerned AI will be used by companies to manipulate the way people think or feel

are worried that AI is making Australians less intelligent

## Social AI

believe that talking with AI  
can help some people develop  
better social skills

think chatting with an AI  
companion/friend can be just  
as fun as chatting to a human

## AI at work

are worried that AI will result  
in people like them losing  
their jobs

say it's a great idea for  
companies to use AI to  
automate routine tasks

## AI at work

are worried that AI will result  
in people like them losing  
their jobs

say it's a great idea for  
companies to use AI to  
automate routine tasks

## AI in the marketplace

are worried their personal data will be used to train AI without consent
