

# How do Venture Studios create value for their LPs

## Compared to Venture Funds?

# Venture Studios play 3 key roles compared to just 1 for Venture Funds

1.

# The Investor Role (Shared with Funds)

Like funds, studios conduct due diligence and protect capital invested across their venture efforts.

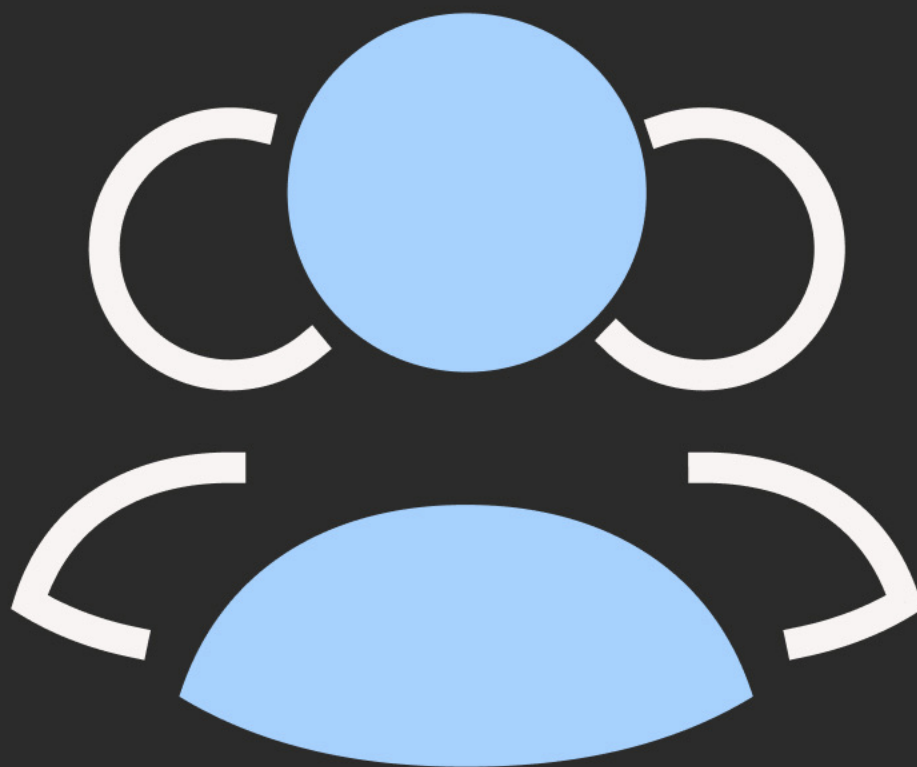

2.

# The Co-Founder & Entrepreneur Role

Studios act as co-founders, deeply involved in building and launching companies.

3.

# The Operator Role

Studios actively operate these companies, ensuring stronger execution and development.

# This high-involvement model de-risks the process of company building through:

Greater capital efficiency

Systematic risk reduction

Because Venture Studios act as founders, they gain access to formation-stage equity. The best deal you can get:

Founder Shares 🏆

# Here's how this compares:

Venture Funds

=

~10% ownership  
per investment

Venture Studios

=

~30% or more  
on average 

(3x the ownership )

# This concentration, focus, and equity advantage enable studios to:

1. Kill off weak ideas early
2. Accelerate incredible opportunities with hands on support, network, and capital.

This disciplined model  
massively de-risks  
early-stage investing...  
...while amplifying the  
focus and effort put  
into each startup.

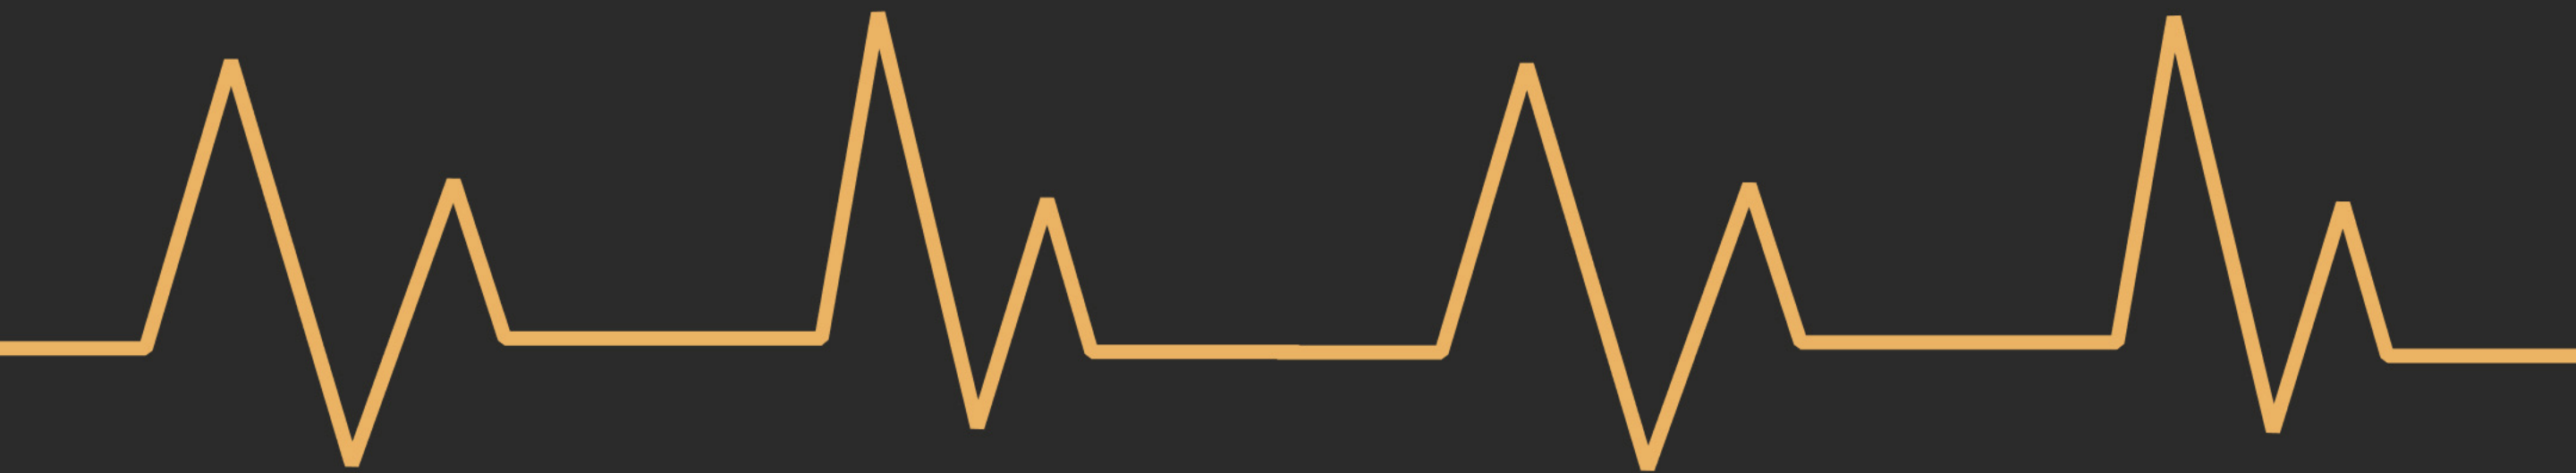

# And the experience of Venture Studios makes all the difference:

## Most studios are led by exited founders or successful investors →

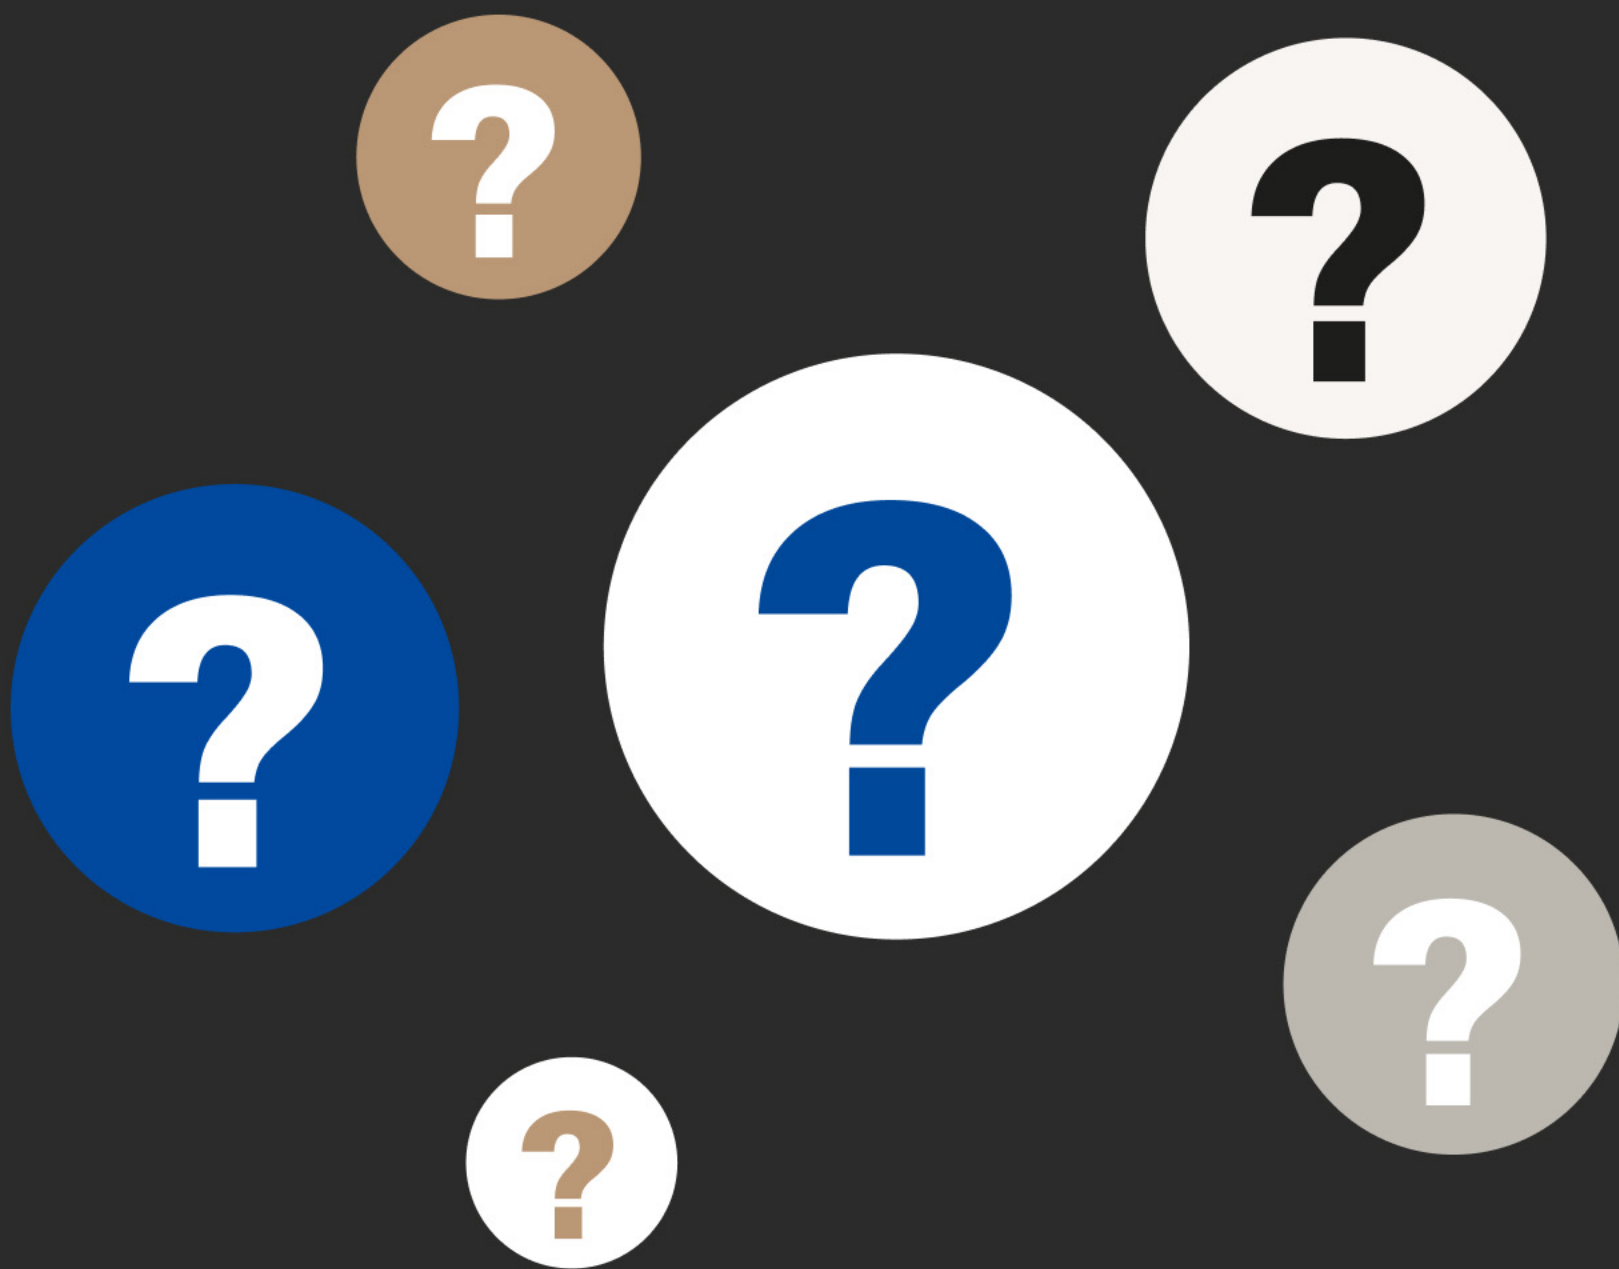

## Bringing trusted networks and proven strategies into each venture.

# The result?

Stronger companies.  
Reduced risk. And  
amplified growth for LPs.

# That's why Venture Studios are changing the game in early-stage entrepreneurship.

**P.S.** If you're interested in learning more about how the studio model works →
