EXPERIENCE

OSC Tech – Software Developer (On-site)

APR 2025 - Present

- Developed and maintained an **Admin Web Application** similar to the backend of apps like Zomato, with modules for **Dashboard, Order Tracking, Employees, Riders, Vendors, Queries, and Zone Management**.
- Engineered the **Order Tracking system**, integrating Google Maps API to display real-time vendor and delivery partner status, product details, pricing, and live support (text & audio chat).
- Built advanced **document verification workflows** with zoom, pan, and annotation features, supporting multiple statuses (Accepted, Rejected, Pending) for vendors, riders, and employees.
- Designed the **Zones module** with interactive Google Maps integration to create zones and pincodes, storing data in **Redux and server APIs** with robust synchronization.
- Implemented a **professional dashboard** using ShadCN UI & Charts with advanced analytics.
- Applied **role-based access control** with secure page restrictions and unauthorized access handling.
- Delivered highly **professional, responsive UI designs** with ShadCN UI components, ensuring a smooth UX.
- Collaborated on **clean architecture patterns**, API structuring, and data modeling, simplifying backend integration and database creation.
- Supported a colleague working on **Flutter/Dart**, solving logic and API integration issues despite not being a Flutter developer, showcasing strong cross-platform adaptability.
- Earned recognition from the company leadership for independent problem-solving, logical thinking, and providing **practical architectural suggestions** that were adopted.

Tech Stack: React.js, Redux, TypeScript, Clean Architecture, ShadCN UI, RESTful APIs, Flutter/Dart, Google Maps API, Docker (multi-stage), Postman

Freelance

DEC 2022 - MAR 2025

- Developed 10+ websites, web apps, mobile apps and e-commerce platforms for various business owners, ensuring functionality, usability, and security.
- Collaborated closely with 6+ clients to understand their needs and actively engage to comprehend their specific needs and preferences.
- Created responsive web applications, enhancing the online presence of businesses and driving customer engagement

Tech Stack: HTML, CSS, JavaScript, Ajax, Php, Wordpress, React js, SQL, RESTfull APIs, Asp .net, Swagger, MVC Pattern, Python(Ai), Android Studio(Java)

KEY PROJECTS

One Admin

A comprehensive web application designed to manage departmental complaints (e.g., Electrical, Housekeeping, Carpentry, etc.) across multiple colleges within a single institution. The system includes role-based access (Admin, Principal, Workers, Students, Super Admin), secure authentication with bcrypt encryption, session-based login, CAPTCHA, and password reset via email. It features advanced complaint tracking with filtering, pagination, and data export (Excel, CSV, PDF), along with subscription renewal management, real-time analytics dashboards, and multilingual support with text-to-speech and translation for accessibility.

Tech Stack: React js, , TypeScript, Redux, Tailwind CSS, Shadcn Ui, Clean Architecture, RESTfull APIs, Postman, Docker, GIT, Postgres, Dart(Flutter)

Education & Job Consultancy CRM

A web-based CRM for education and job consultancies, enabling even small teams to digitize workflows at low cost. Supports **Super Admin, Admin, and Staff roles** with features like manual/bulk lead entry (CSV/XLSX), automated follow-up tracking, lead history, one-click WhatsApp, college assignment, admission date scheduling, and secure admin-controlled enrollment confirmation. Includes **notifications, missed follow-up recovery, lead transfers, performance analytics, staff incentive system, mobile-responsive design, direct SIM-based calling, role-based authentication (CAPTCHA, bcrypt), bulk data export with selective hiding, and college data management.**

Tech Stack: HTML, CSS, JavaScript, Ajax, PHP, MySQL, Bootstrap, Datatables, bcrypt encryption

SKILLS

- React js, Next.js, TypeScript, Redux, Tailwind CSS, Bootstrap, Shadcn Ui, HTML, CSS, JS, Ajax, Android Studio, Photoshop, Figma
- NodeJs, Php, ASP .NET, RESTfull APIs
- Swagger, Postman
- Clean Architecture, MCV Pattern
- Docker, GIT
- Postgres, MongoDB, SQL
- Wordpress, Blogspot, Domain & Hosting
- C, C++, C#, Java, Python(With Ai), Dart(Flutter)

EDUCATION

Nehru Institute Of Information Technology And Management

Master Of Computer Applications (79 %)

AUG 2022 - AUG 2024

(CGPA - 7.9 / 10.0)
