Introduction

Problem

Chasing the meme hype is like navigating a jungle filled with hidden treasures and booby traps. It's an adventure, but only the brave survive! From this challenge, a brilliant idea emerged: what if there was a project that effortlessly followed all the hype?!

Solution

Instead of investing a little in several meme coins that are currently trending, we can invest in a single project that returns a huge amount of all these meme coins to investors. Simply put, this project will consistently follow the hype, irrespective of the current meme coin scenario.

Lucky Meme

How is this done?

It is clear that it is not possible to reward all investors equally so that everyone makes a profit. Instead, we offer massive prizes to just a lucky few. This is a natural and even expected trade-off in the crypto world. That said, participating in the drawings is very budget-friendly, so it's definitely worth spending a few dollars for the chance to realize your major dream.

Trader or Hodler?

As with any project, you can just hodl. The day to day trading and speculation doesn't matter to the hodler. However, this project offers something unique in the market. It actively encourages and rewards trading activities. Put simply, the higher your trading volume, the greater your chances of winning prizes. These rewards accumulate much like points earned by traders.

Prizes

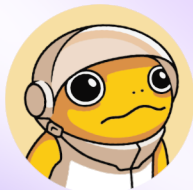

Lucky Meme gives away memecoin prizes every week and month. Plus, we have the big jackpot of the year, in Ether!

All holders automatically participate in the draws. It doesn't get any better than that! There is no meme war here, just love and lots of profit!

To find out more details about how the draws work, access our tutorial:

Lucky Meme

Roadmap: The path to success starts now

Phase 1: Presale and Marketing

Lucke Meme starts off with a transparent presale, ensuring fairness among investors. A portion of the proceeds will fuel a comprehensive marketing plan, while another part will go towards future rewards, laying the groundwork for broader adoption and growth.

Phase 2: Listings

Lucke Meme is set to achieve major milestones, including its public launch on Uniswap's DEX. Additionally, it will be listed on Coingecko and Coinmarketcap, boosting visibility and credibility in the crypto space. These developments mark crucial steps towards wider adoption and recognition.

Phase 3: Time to make big moves

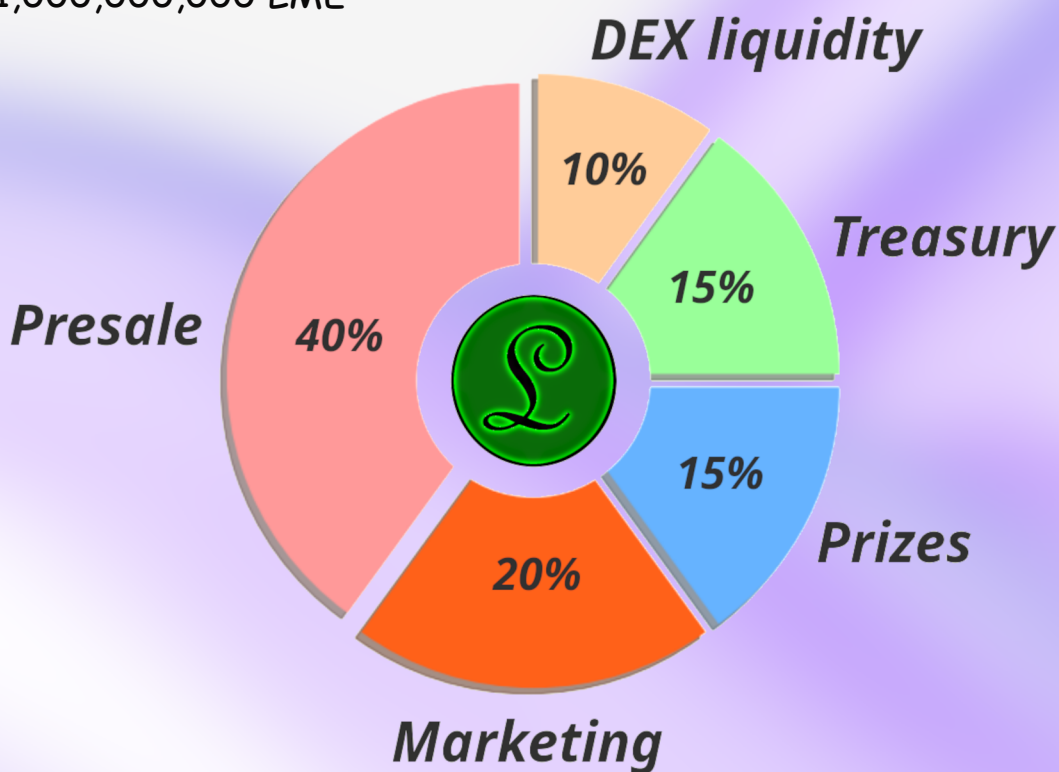

In the coming months, Lucke Meme will amplify its marketing campaign to engage a broader audience, preparing for a notable debut on centralized exchanges (CEX). With the prospect of enhanced trading options and improved access, it aims to establish itself prominently.

Token allocation

Presale

The presale stage plays a crucial role in distributing the initial tokens, ensuring fair access for early investors. It serves as an opportunity for supporters who share the vision of Lucky Meme to engage actively in its journey right from the beginning.

Marketing

20% of the tokens are allocated to marketing activities. This allocation serves to increase awareness, advertise the project, and draw more users to Lucky Meme. Marketing endeavors encompass advertising, collaborating with influencers, engaging the community, and implementing other strategic initiatives.

Treasury

This reserve aims to ensure the project's continued growth and sustainability by allocating financial resources for future initiatives and operational costs.

DEX liquidity

Lucky Meme allocates 10% of the total token supply to adding liquidity to the Uniswap pool. This strategy helps to maintain robust trading volumes for the token and reduces potential price fluctuations, thus protecting the interests of both early adopters and future investors.

Prizes

A significant amount of tokens is reserved to be distributed to the holders in the form of prizes, motivating them to stay involved in the project while being rewarded. This allocation promotes participation and strengthens the community-oriented aspect. Furthermore, this gives the small holder the chance to suddenly become a big holder.

Disclaimer

LME is for entertainment purposes only. It is not gambling, not a lottery, or similar. Holders do not need to purchase a ticket, subscription, or any other item to participate in the draws; the only condition is to be a holder. Additionally, there is no withdrawal process for the prize; prizes are simply awarded to the holder. Specifically, the entire draw and prize system functions as a donation system developed by the team to reward holders and incentivize their continued involvement in the project. Holders can simply hold their tokens and potentially receive prizes without actively participating in the draws. The reward system does not require holders to demonstrate their desire to participate in the draws.
