

GRV CHEMICALS LLP

SPECIALTY CHEMICALS · CUSTOM SYNTHESIS

Global Sourcing. Custom Solutions. Reliable Chemistry.

— ABOUT US

Specialty chemicals, customised and synthesized with customer in focus.

GRV Chemicals LLP is a specialty chemicals and custom synthesis manufacturing company specializing in chlorobenzenes, chlor-alkali chemicals, oilfield chemicals, plasticizers, and fuel additives with a proven track record of delivering custom solutions for leading conglomerates.

We serve customers across India and global markets, leveraging our technical expertise, manufacturing capabilities, and extensive international sourcing network to deliver reliable chemical solutions. Our team works closely with customers to understand their requirements from both technical and commercial perspectives, enabling us to provide tailored, value-driven solutions.

OUR PRODUCT RANGE

A focused range across specialty intermediates, chloro-alkali chemicals, performance additives and plasticizers.

01

Chlorobenzenes

- Monochlorobenzene
- Para-Dichlorobenzene
- Ortho-Dichlorobenzene

02

Chloro-Alkali Chemicals

- Caustic Soda Flakes
- Caustic Soda Lye
- Hydrogen Peroxide

03

Oilfield Chemicals & Additives

- Calcium Chloride 94% min
- Guar Gum and its derivatives

04

Plasticizers

- Chlorinated Paraffin
- Dioctyl Phthalate
- Dibutyl Phthalate

05

Fuel Additives

- 2-Ethylhexyl Nitrate
- N-Methyl Aniline

OUR PRODUCT RANGE

Specialty plasticizers, flame retardants, lubricant additives and polymer & PVC additives — engineered for performance.

06

Specialty Plasticizers

- Dioctyl Fumarate (DOF)
- Dibutyl Fumarate (DBF)
- Trioctyl Phosphate (TOP)
- Tributoxyethyl Phosphate (TBEP)

06

07

Flame Retardants

- Tris(2-Chloroisopropyl) Phosphate (TCPP)
- Triethyl Phosphate (TEP)

07

08

Lubricant Additives

- Zinc Dialkyldithiophosphate (ZDDP)
- Dimethyl Thiophosphate (DMTP)

08

09

Polymer & PVC Additives

- Chlorinated Paraffin Powder (CP Powder)
- PVC Compounds

09

Tailored chemical solutions, built around technical and commercial requirement.

KEY HIGHLIGHTS

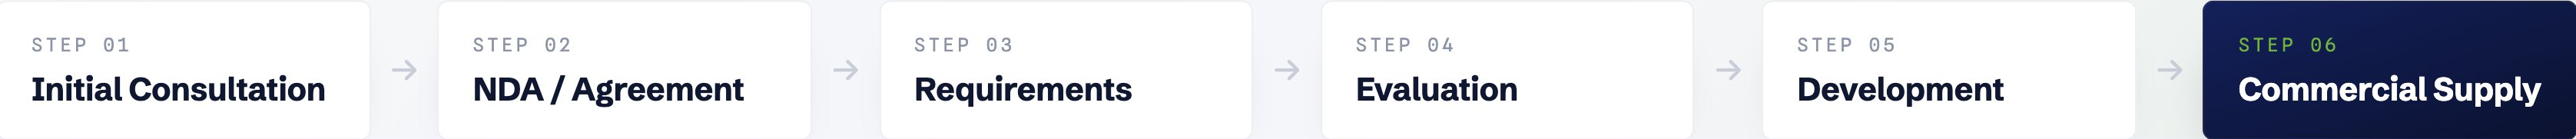

- 01 Custom synthesis through strategic manufacturing partners
- 02 Development of application-specific chemical solutions
- 03 Capability from lab-scale to commercial production
- 04 Custom Synthesis Backed by Confidentiality and Trust
- 05 Flexible specifications based on end-user requirements

OUR APPROACH

Lab-scale to commercial supply, with flexibility on spec, volume, and timing.

TECHNICAL · COMMERCIAL · RELIABLE

PROCESS FLOW

Comprehensive Reaction & Synthesis Capabilities

Halogenation & Functional Groups

6 types

Selective halogenation and functional-group transformations.

Bromination

Chlorination

Acylation

Alkylation

Amination

Aminolysis

Advanced Synthesis

6 types

Multi-step routes that build complex molecular frameworks.

Cyclization

Esterification

Etherification

Oxidation

Condensation

Triazole chemistry

Named Reactions

Specialist

Classical, well-controlled routes for precise functionalization.

Balz-Schiemann

Sandmeyer

Vilsmeier-Haack

Hofmann Rearrangement

Diazotization

Claisen Condensation

Specialized Expertise

4 areas

Stereoselective and heterocyclic chemistry for high-value intermediates.

Chiral & stereoselective

Thiazine derivatives

Complex heterocycles

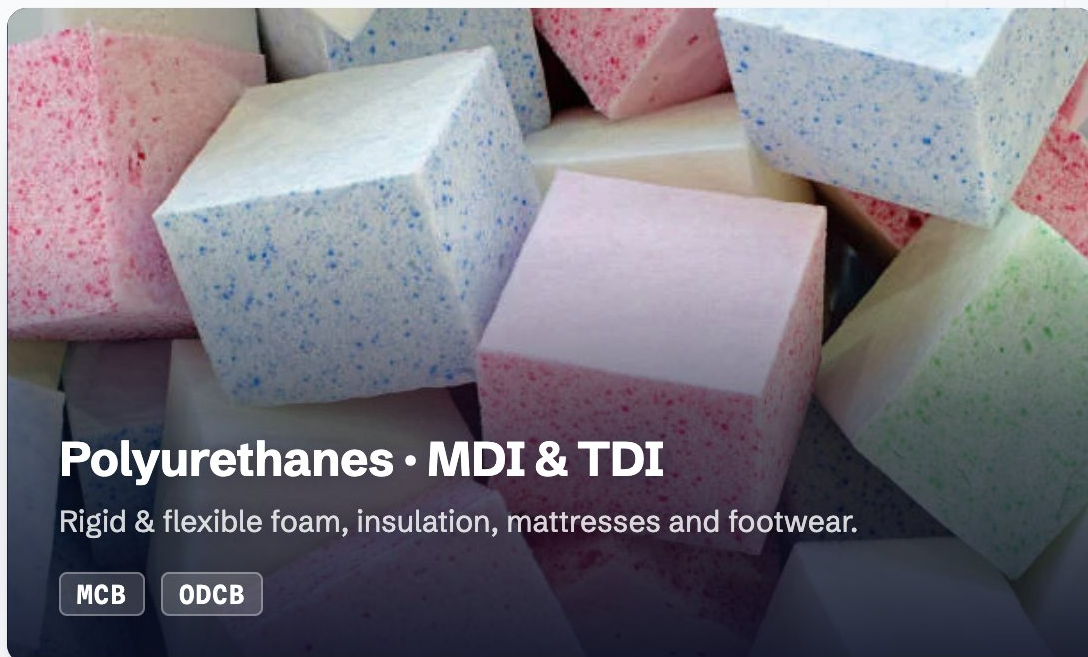

Multi-step custom routes

Through dedicated synthesis manufacturing sites, GRV builds custom molecules across a wide range of reaction chemistry — from selective halogenation to classical named reactions and complex multi-step routes, lab scale to commercial supply.

APPLICATIONS

Where our products add value.

Every molecule we supply becomes part of something tangible — polyurethane foam, PVC, fuel, crops and everyday goods.

Polyurethanes • MDI & TDI
Rigid & flexible foam, insulation, mattresses and footwear.

MCB ODCB

Flexible PVC
Pipes, garden hoses, cables, flooring and leather cloth.

Chlorinated Paraffin DOP DBP

Gasoil & Gasoline
Octane boosting and cetane improvement for road fuels.

NMA 2-EHN

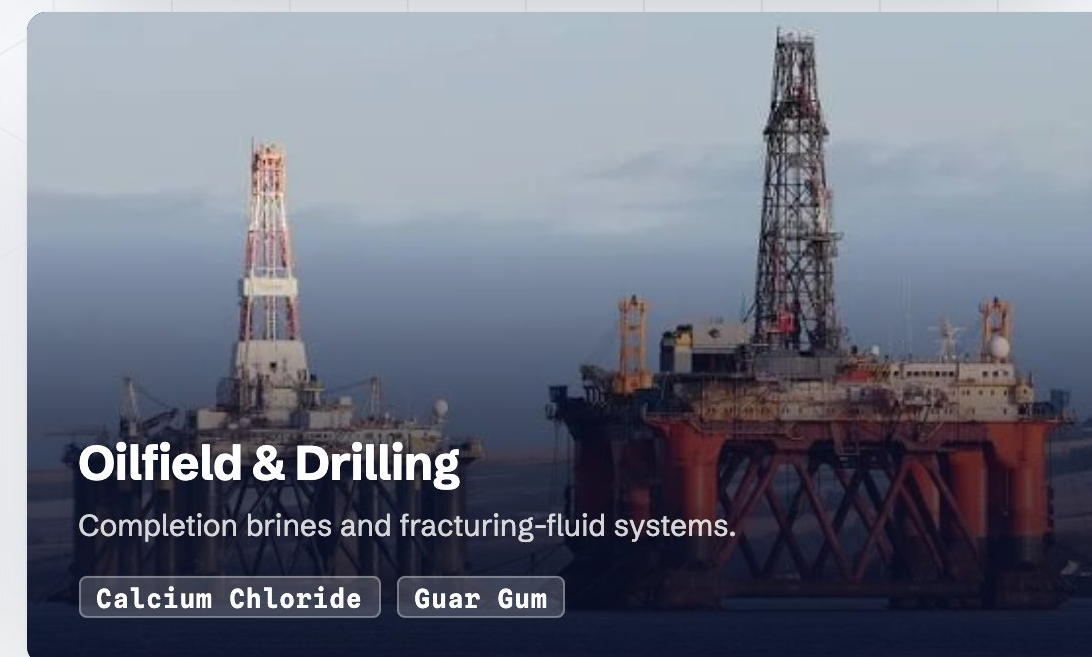

Crop Protection
Intermediates for pesticides, herbicides and fungicides.

MCB ODCB

Soap, Paper, Textiles & Water Treatment
Bleaching, processing and water & effluent treatment across everyday consumer and industrial goods.

Caustic Soda H₂O₂

Oilfield & Drilling
Completion brines and fracturing-fluid systems.

Calcium Chloride Guar Gum

Built a step ahead of the market.

We pair the discipline of an established manufacturer with the systems and partnerships of a modern, forward-looking chemicals business.

01

Robust quality systems

Adherence to high-quality standards, applied consistently across every product and process.

02

Distribution & contract manufacturing

A well-functioning distribution network backed by established contract-manufacturing sites.

03

Strategic upstream relationships

Long-standing, well-maintained partnerships with leading raw-material manufacturers.

04

A modern digital backbone

Standardized business procedures powered by a state-of-the-art ERP, an in-house CRM, and AI-driven workflows that enhance efficiency, data management, customer engagement, and decision-making

Let's build something reliable.

Get in touch with our sourcing and technical team to discuss requirements, samples, or long-term supply.
