Klimawandel: Kürzere Winter sorgen für trockenere Sommer

BRAUNSCHWEIG. Forscher veröffentlichen neue Studie zu Klimawandel-Folgen. Biologin: Seit Sommer 2018 ist zu wenig Wasser im Boden.

Andreas Eberhard und dpa
05.07.2020 - 20:00 Uhr

Die Ausbreitung der Böden ist vielerorts bereits bittere Realität.

Foto: Federico Gambarini / dpa

Ein früheres Ergrünen der Pflanzen im Frühling hat vielerorts trockenere Böden im anschließenden Sommer zur Folge. Das sehen Forscher nach der Auswertung von Satellitendaten und Modellrechnungen bestätigt. Der Effekt werde im Zuge des Klimawandels regional zu häufigeren und stärkeren Hitzewellen führen und die Verfügbarkeit von Wasser vermindern, erläutern die Wissenschaftler um Shilong Piao von der Universität Peking im Fachmagazin...

Saifedean Ammous outlines plan for BTC domination

In a move sure to delight fans of “The Bitcoin Standard”, author and university hater Saifedean Ammous has outlined the exact steps BTC is going to take to achieve world domination.

Professor Ammous, who prefers to go by the title “His Worshipfulness”, outlined the plans during his presentation at the recent “JUST HODL and don’t do Business with BTC” conference in North Korea.

who use pockets.

The steps, according to the professor, are as follows.

1. Price of BTC goes up due to scarcity.
2. ... unclear ...
3. BTC becomes global monetary standard.

The audience was absolutely thrilled during the presentation. CBD spoke with some of the attendees afterwards. "This is absolutely clear scientific evidence that BTC will be the global monetary standard," said attendee and new Kraken shill, Pierre Rochard. "Anyone who doesn't agr

The audience was absolutely thrilled during the presentation. CBD spoke with some of the attendees afterwards. “This is absolutely clear scientific evidence that BTC will be the global monetary standard,” said attendee and new Kraken shill, Pierre Rochard. “Anyone who doesn’t agree with this conclusion doesn’t understand economics and is anti-science.” Pierre tweeted slides from the presentation which went viral on crypto twitter.

We caught up with Saifedean Ammous to chat about his popular revelation.

CBD: So can you clarify more about step 2. It’s quite hazy.

SA: Look, that part is unclear. No one really knows what happens in that step. Anyone pretending to know is a liar.

CBD: So how exactly can you be sure step 3 happens then?

SA: It’s quite obvious from studying the history of money. With all the different monetary items that have evolved in human history, glass beads, sea shells, gold.. well, they all took different paths to step 3. And because BTC will also take a different path, that’s proof it will be the global monetary standard.

CBD: Ok but, lots of other things never became money, and they also went up in value a lot. I mean, platinum never became global money. And if gold were to 10x in value today it still wouldn’t start being used as money by everyone. Why will people start being happy to pay high transaction fees with slow confirmation times on BTC just because it’s worth \$1,000,000 ?

SA: You sound like someone who doesn’t eat meat.

CBD: No. I eat meat. I’m an omnivore just like most humans.

Besser mit Blockchain

- Viele Outputs → Income Sharing, Affiliates ...
- Content Kuration
- P2P Micro-Abos, Kommentare ...
- Automatic sharing
- Generell: Zahlungsproblem gelöst → Fokus auf Anwendung
- Smart Contracts, onchain-Daten

Welche Blockchain? BSV

- MedioPay benutzt Bitcoin Sportverein (BSV), weil ...
- Beinahe nicht-existente Transaktionsgebühren
- Protokoll-Reife: Gute Libraries, einfache Implementierungen
- MoneyButton: mehrere Outputs, Moneybutton-ID
- Onchain-Daten

Welche Blockchain? BCH

- Badger-Wallet (2 Klicks, aber nur ein Output)
- Ebenfalls: geringe Gebühren, onchain-Daten
- „Beinah so gut“

Andere Blockchains?

- ETH: Zu teuer, unbestätigte Transaktionen nur mit Full Node, Onchain-Daten aufwändig
- Ripple, Stellar, Dash, Litecoin: Keine 1-Klick-Lösung, geringere Protokollreife

What about Lightning?

- Echtzeittransaktionen, sehr günstig: Top!
Aber ...
- Empfang nur mit Node + Online möglich
(No-Go mit Wordpress).
Liquiditätsmanagement.
- Keine onchain-Daten, keine Info zu
Sender
- Keine mehrfachen Outputs

Bis bald!
